

**3rd Regional Workshop of CARE Component 1:  
Regional Sectoral Focal Points Meeting**

24 February 2025

**IMPLEMENTATION PROGRESS:**

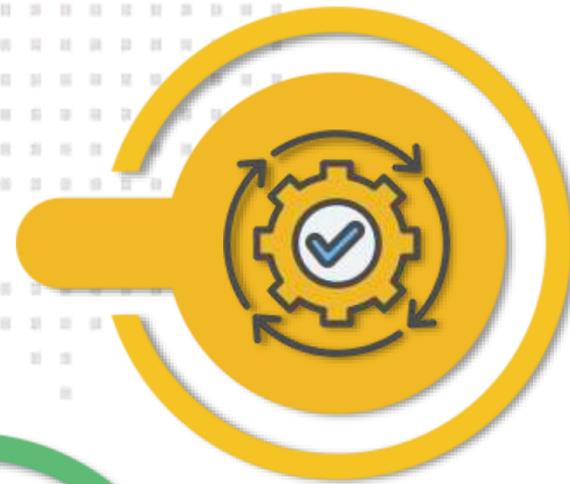

**Nepal**

# AGENDA

Operationalization  
of the DSSs

User-Centered  
Improvements Based  
on Feedback

Enhanced Early  
Warnings

Mobile Apps

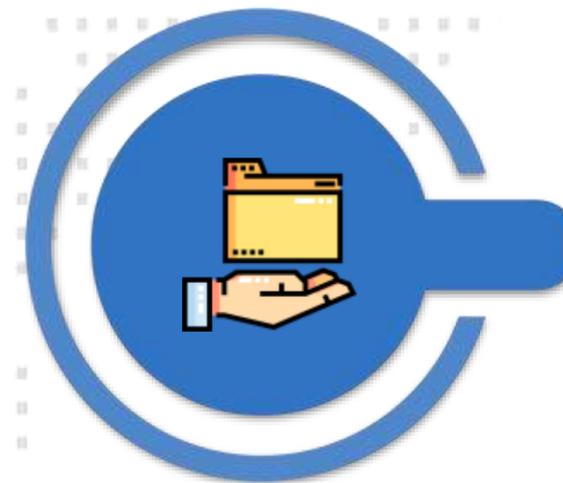

## PROGRESS & ACHIEVEMENTS

Digital & Technical  
System Enhancements

Handover of system  
and hardware

Capacity Building

# Satark DSS (National Disaster Risk Reduction & Management Authority)

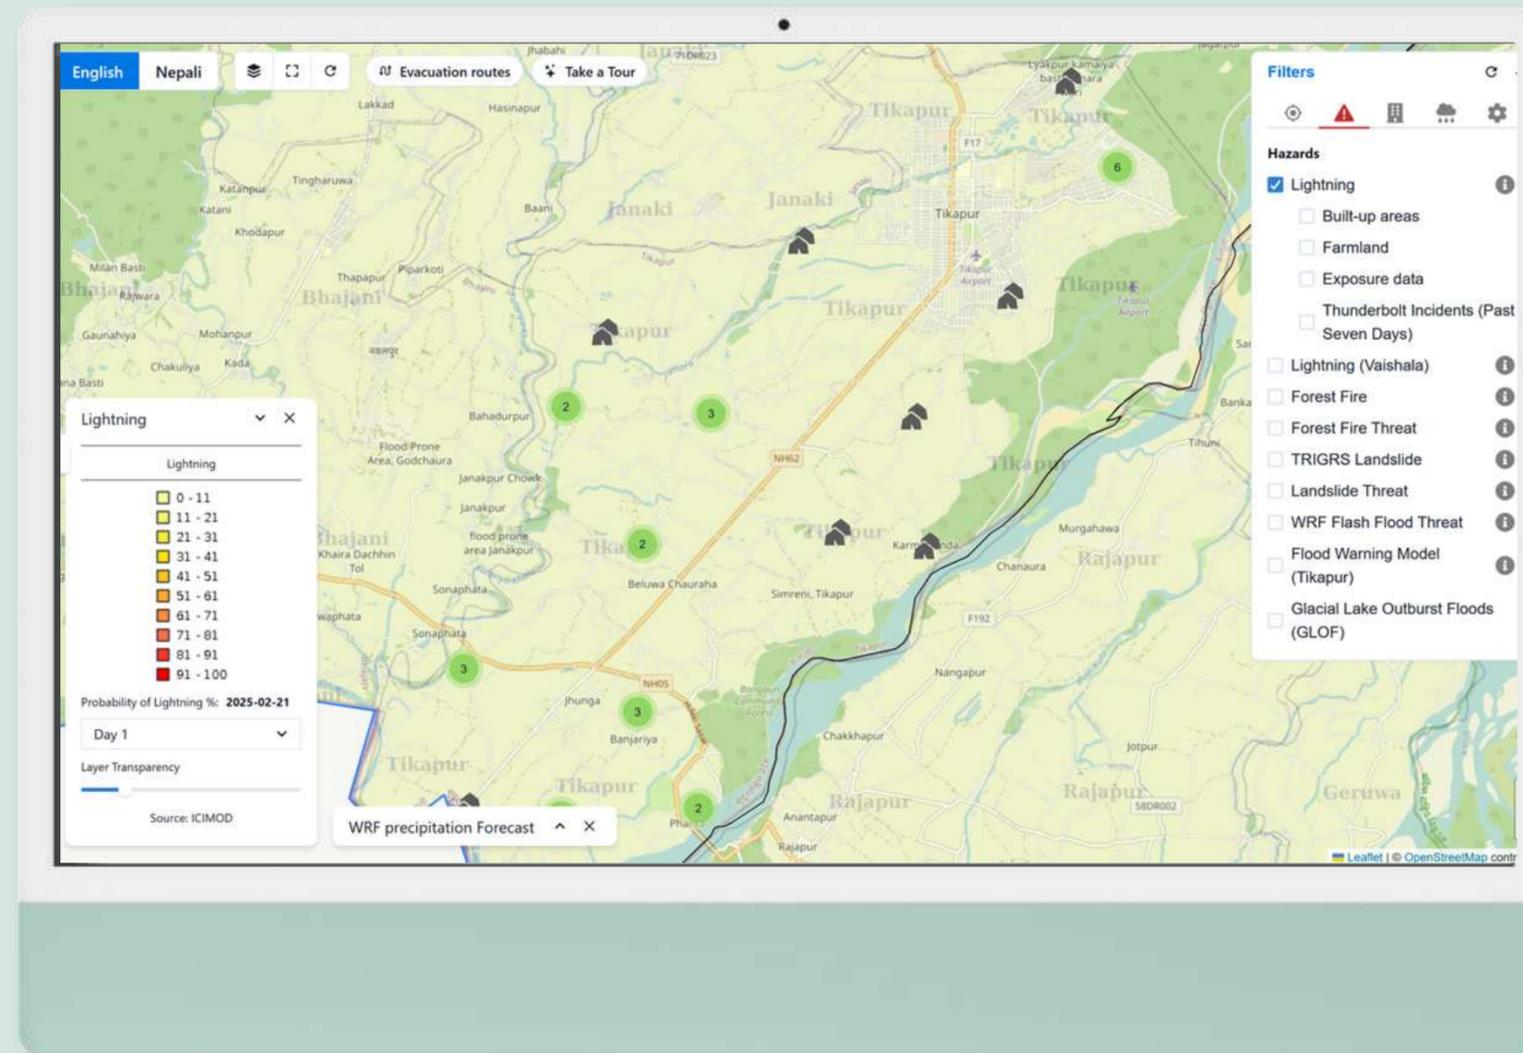

<https://satark.bipadportal.gov.np>

## Progress

Integrated HIWAT & VAISHALA for tracking lightning events

Developed TRIGRS & Weighted Overlay Model that provide landslide threat outlook up to 2 days in advance (with provision of extending to 10 days)

Integrated SAFFGS that provides 3-hours & 6-hours flash flood alerts

GLOF included in the system as per feedback

Incorporated evacuation route mapping to support emergency response and planning

Integrated HIWAT-based forest fire model & developed Weighted Overlay Model that provide forest fire outlook up to 2 days in advance (with provision of extending to 10 days)

# Satark DSS (National Disaster Risk Reduction & Management Authority)

<https://satark.bipadportal.gov.np>

## Achievements

Infrastructure &  
System Transfer

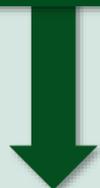

Integration with  
National Platforms  
(progressing)

Expansion & Scaling

Operationalization &  
Capacity Building

User Engagement &  
Feedbacks

Governance Linkage:  
Bridged the coordination

# NAVIGATE DSS (Department of Roads)

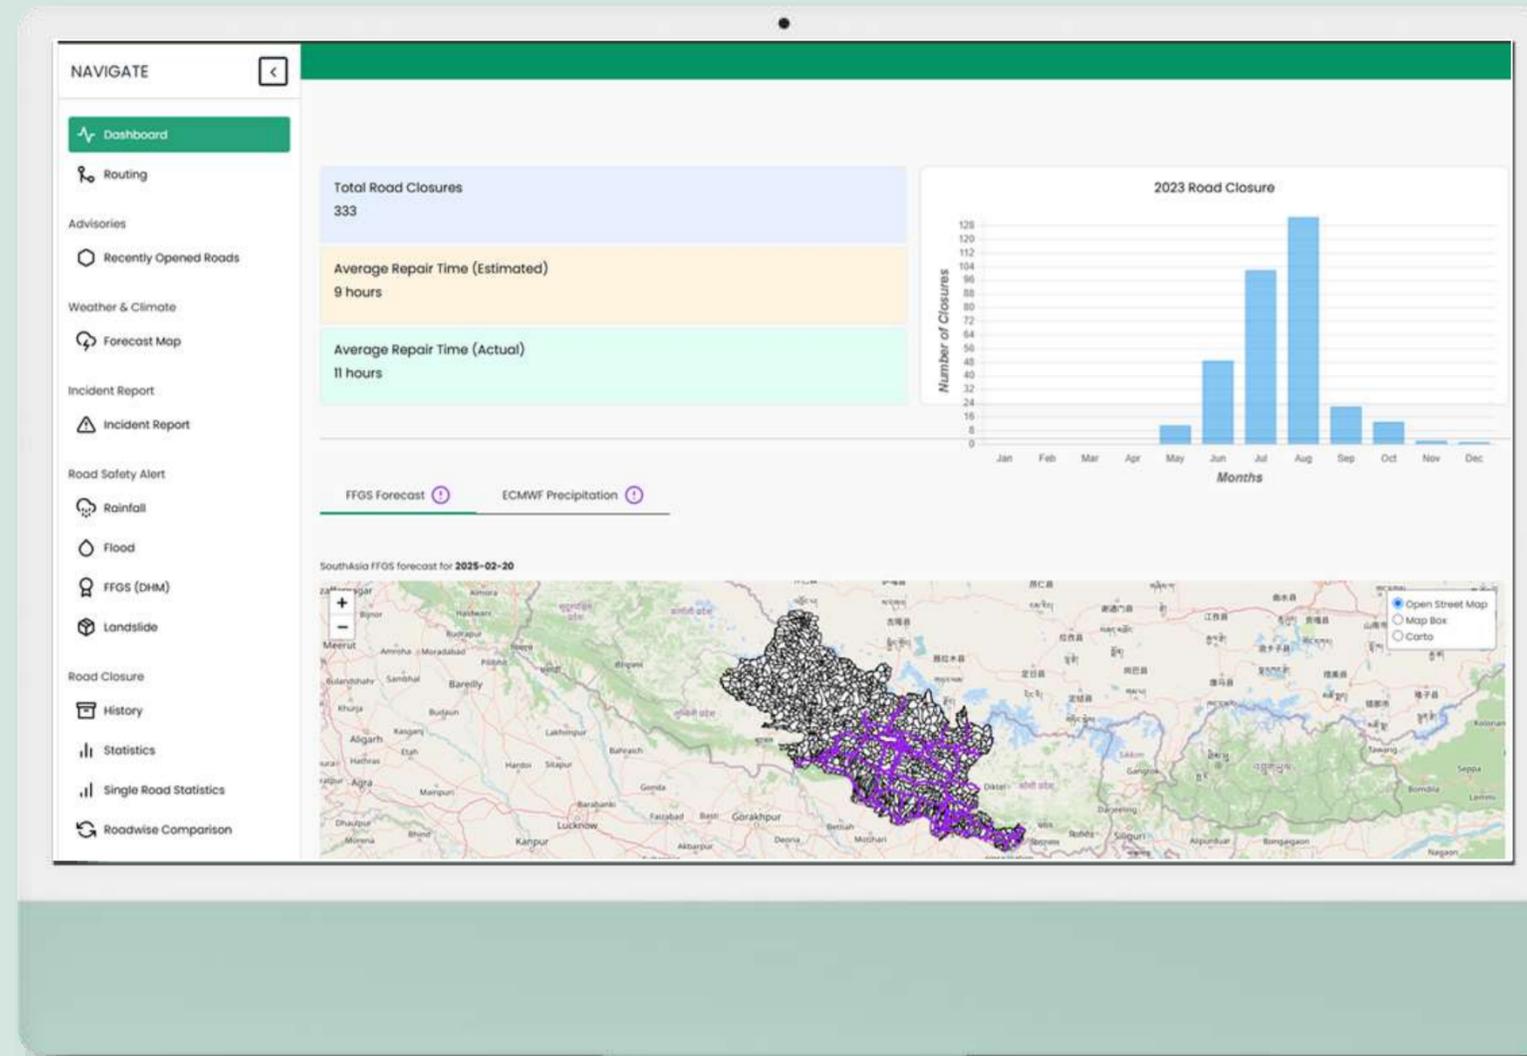

<http://navigate.dor.gov.np>

Progress

Weather & Climate Visualization –  
Uses ECMWF forecast data (10-day  
outlook, 6-hour timestep)

Computation integrated with road  
closures

Road Closure, bridge closure with  
statistics

Flash Flood Early Warning – Based on  
the HEC-HMS model (Madhesh  
province, Bagmati & Koshi basins).

Advisories; Road Safety Alerts (Flood,  
Landslide)

Incident Report; Alternative Route;  
Equipment History

# NAVIGATE DSS (Department of Roads)

<http://navigate.dor.gov.np>

## Achievements

Infrastructure &  
Security Enhancements

Digitization of manually  
and error prone road  
closure data entry system

Digitization of mobilizable  
equipment for use during  
road closures or disasters  
like landslide

Analysis tools built from  
the digitized data via  
the process of ETL

System operation &  
capacity building

User engagement &  
weekly based feedbacks  
mechanism

# Krishi Mausam Sallah Pranali (ADVISE) DSS

<http://advise.moald.gov.np/>

Progress

Crop Information management module

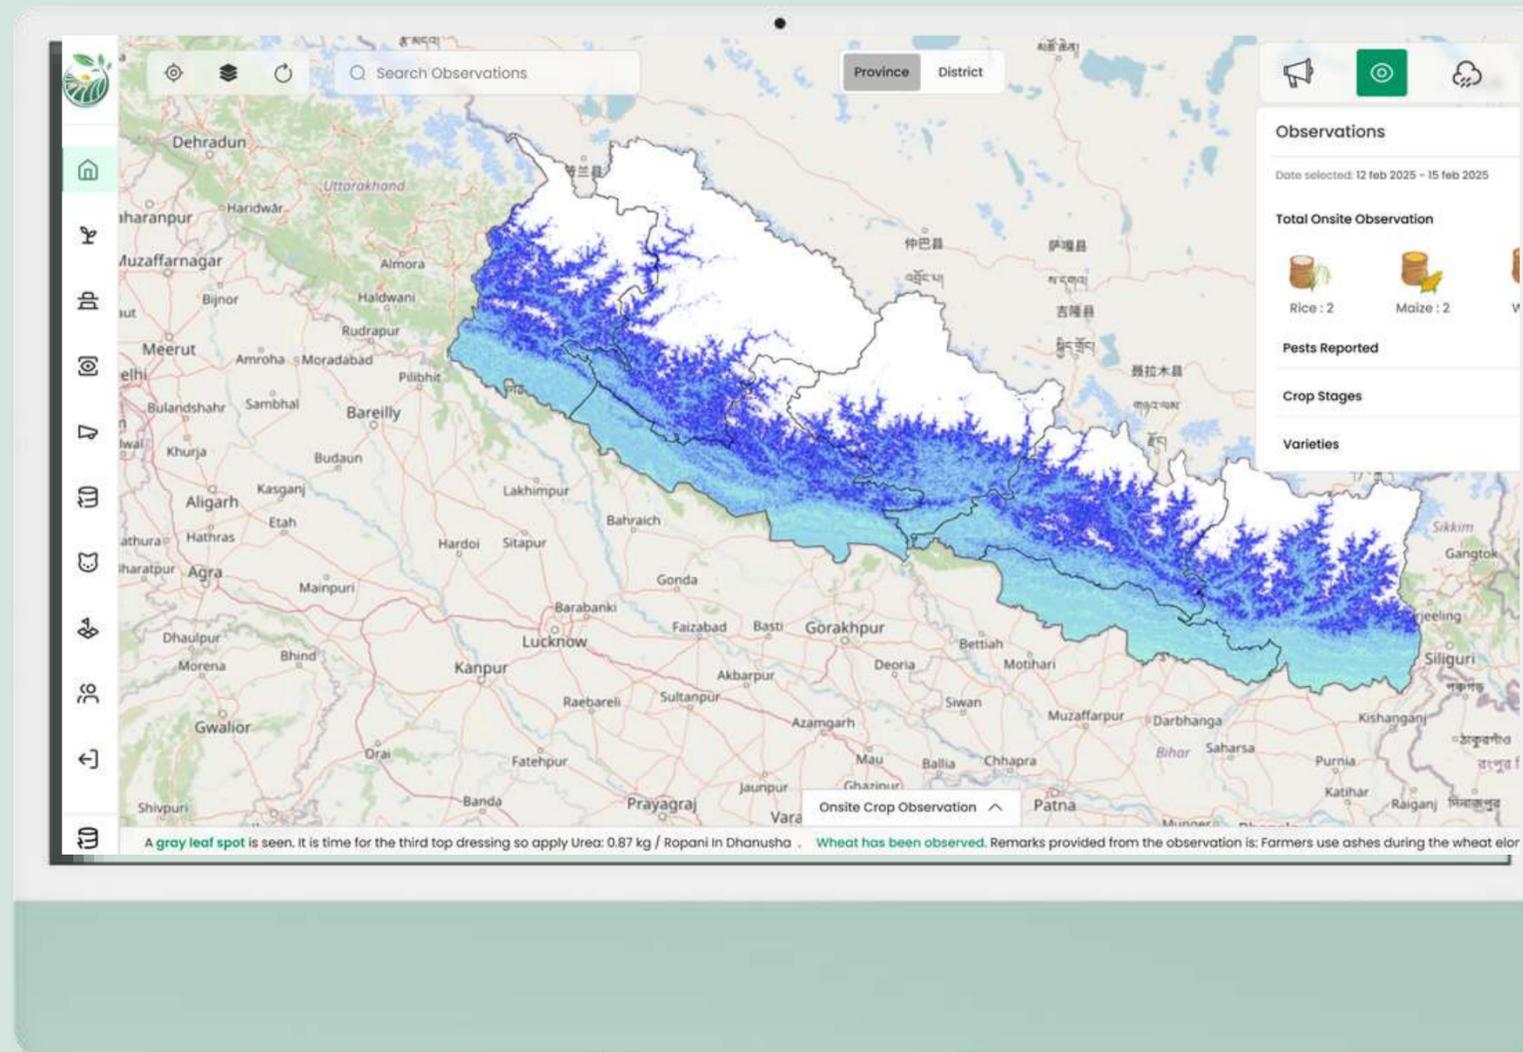

Crop Data repository

3 days Climate informed Crop Advisories

Dynamic cropping calendar

Onsite observations module

Land Cover Change

Weather-pest and Weather-crop impact analysis tools

Livestock information management module

Livestock Vaccination Advisories

Livestock Data repository

TEMPERATURE SENSITIVITY ALERT SYSTEM (TEMPS)

# Krishi Mausam Sallah Pranali (ADVISE) DSS

<http://advise.moald.gov.np/>

## Achievements

Crop & district  
specific climate -  
informed Advisory

Onsite Observations  
& Reporting

System transfer &  
integration

Government engagement  
& data contribution

Community level  
engagement

User engagement &  
feedback mechanism  
- weekly

Digitization of data  
(pdf into digital form) into  
data repository

System operationalized  
& capacity building

Capacity building of users  
from federal government  
to communities

# Mobile Applications

Krishi Mousam Sallah Pranali (ADVISE)

<https://play.google.com/store/apps/details?id=np.gov.doanepal.advice>

NAVIGATE

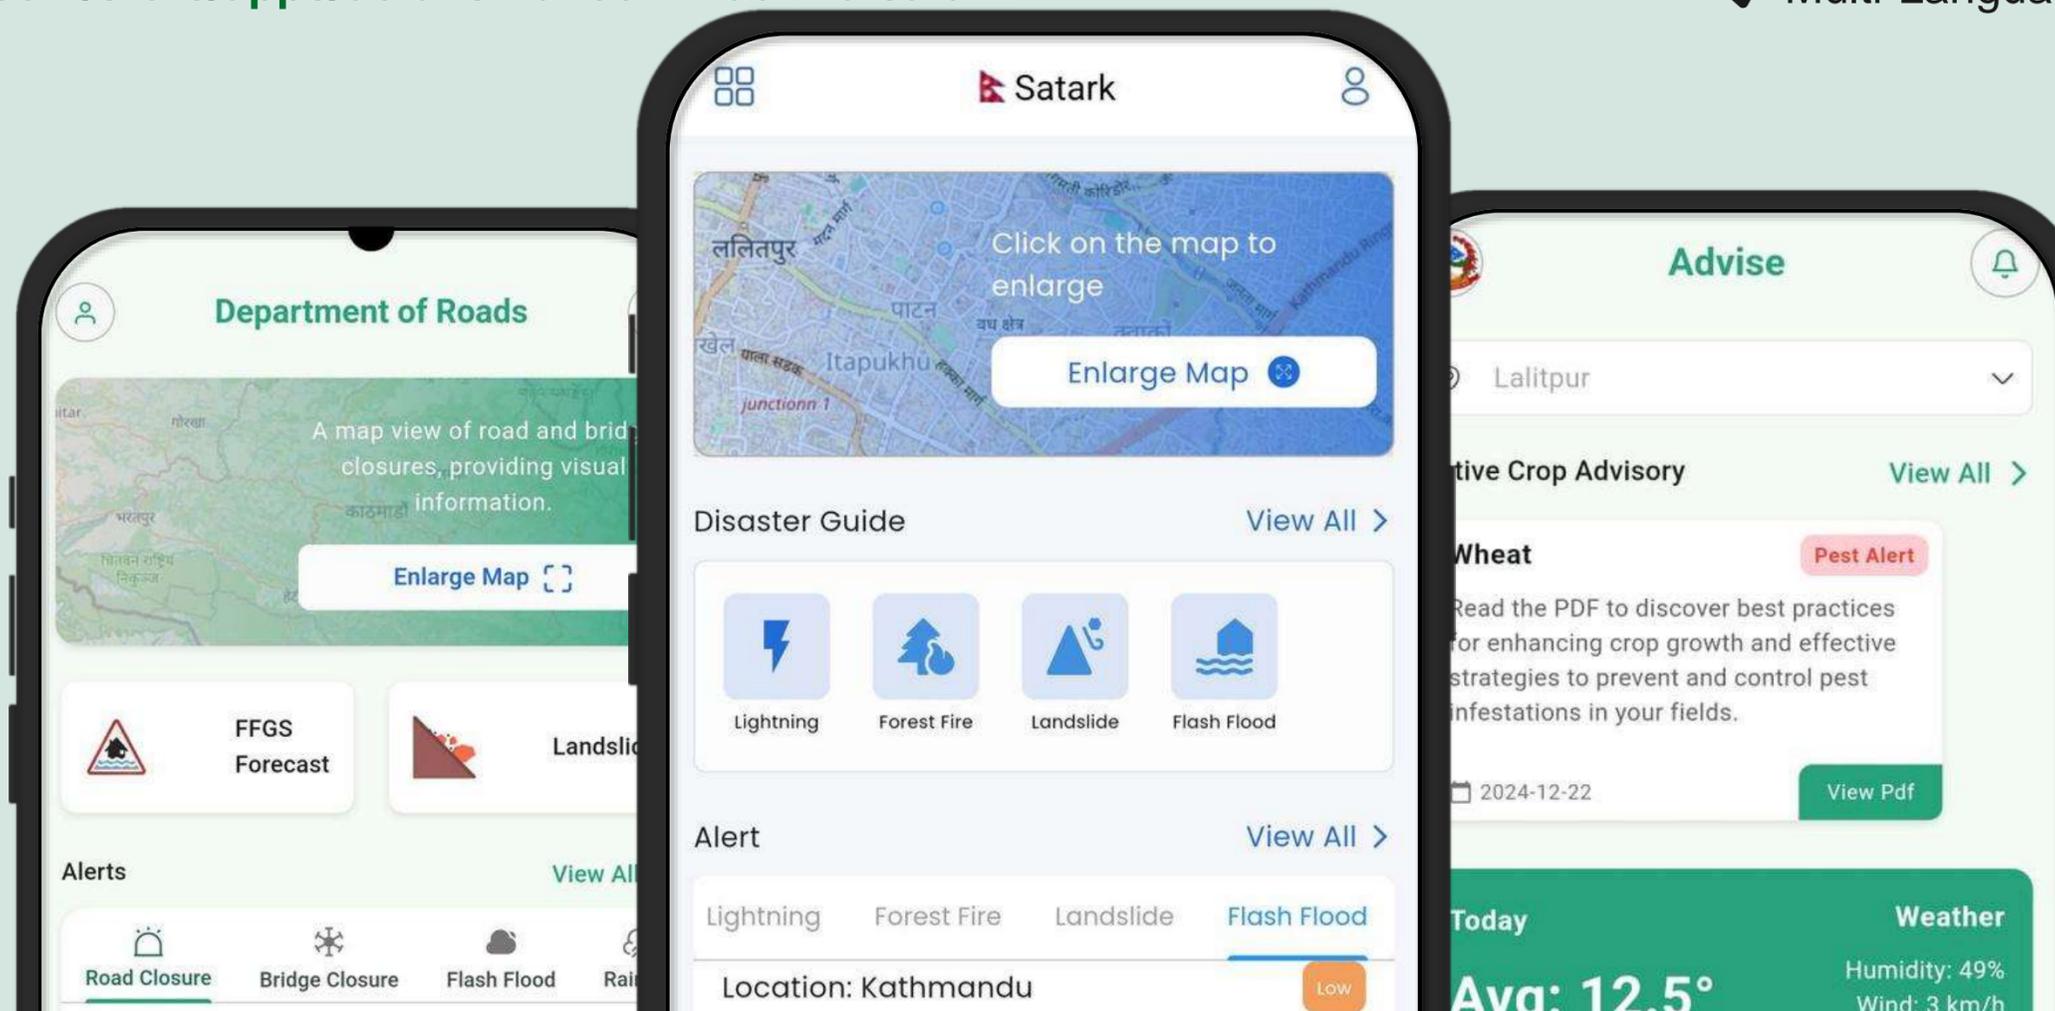

<https://play.google.com/store/apps/details?id=np.gov.dor.dor&pli=1>

Satark

<https://play.google.com/store/apps/details?id=com.nddrma.satark>

## Features

- ✓ Interactive map
- ✓ User authentication
- ✓ Real time alerts and notifications
- ✓ Crop advisory based on location
- ✓ Field data collection Form
- ✓ Multi-Language Support

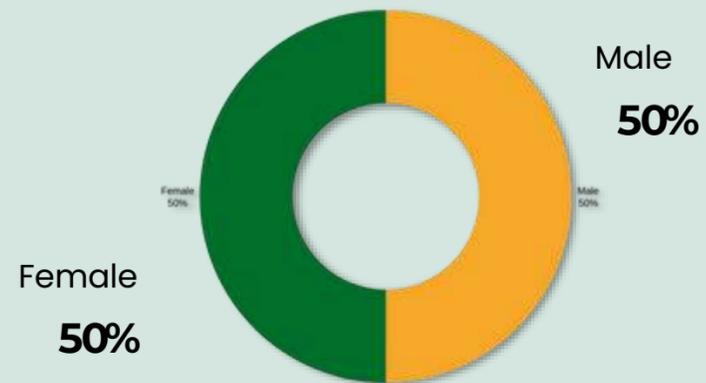

# Capacity Building Activities

## Experience Sharing : Farming Community

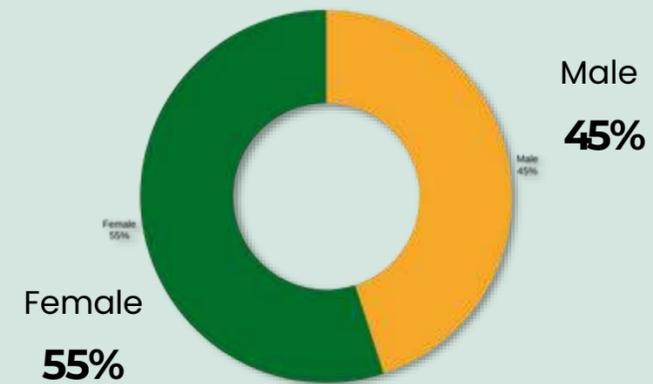

Demonstration of climate information application in communities

21 & 22 Nov 2024

19 & 20 Jan 2025

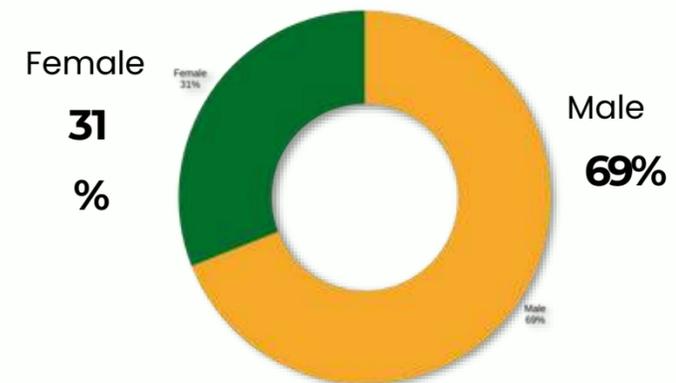

## TOT

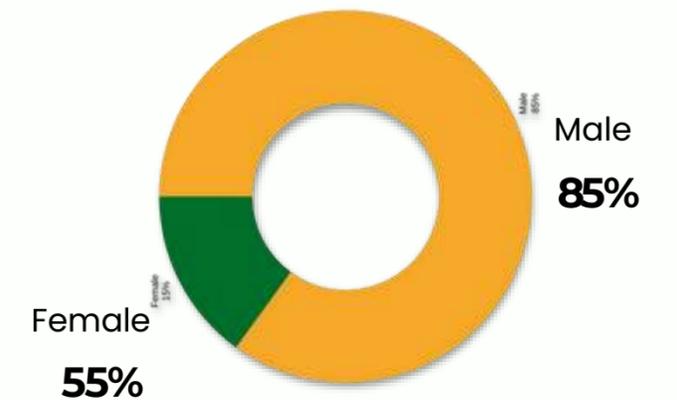

Climate Information Application in Agriculture and DRM Sector

05 & 07 Aug 2024

12 & 15 Feb 2025

# Capacity Building Activities

## CAF Events 2024

**13 May 2024**

National Level Monsoon CAF

**12 Jun 2024**

Province Level Monsoon CAF (Bagmati)

**8 Dec 2024**

National Level Winter CAF

**10 Dec 2024**

Province Level Monsoon CAF (Madesh)

**19 Dec 2024**

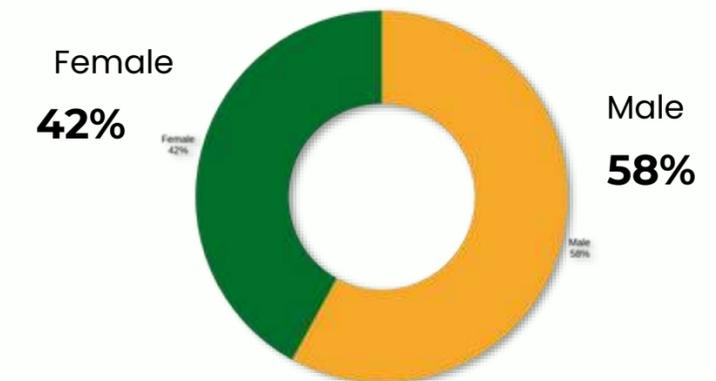

Province Level Winter CAF (Bagmati)

Agriculture Sector

## Community Based Training: Madhesh Province

**26 & 27 Oct 2024**

# Impacts of Capacity Building

CAF: Platform for knowledge-sharing & collaborative seasonal preparedness

Trained personnel delivering knowledge & capacity building locally (DRM & Agriculture)

Climate Information Application trainings: Trained officers and engaged 165 farmers on climate applications

Trained officials for pest & disease data integration into ADVISE DSS

Structured feedback improved ADVISE system & implementation strategy

Enhanced capacities on advisories generation

Improved officials' (DOR, MOALD, NDRRMA) operational competency in system functionalities

# Sustainability

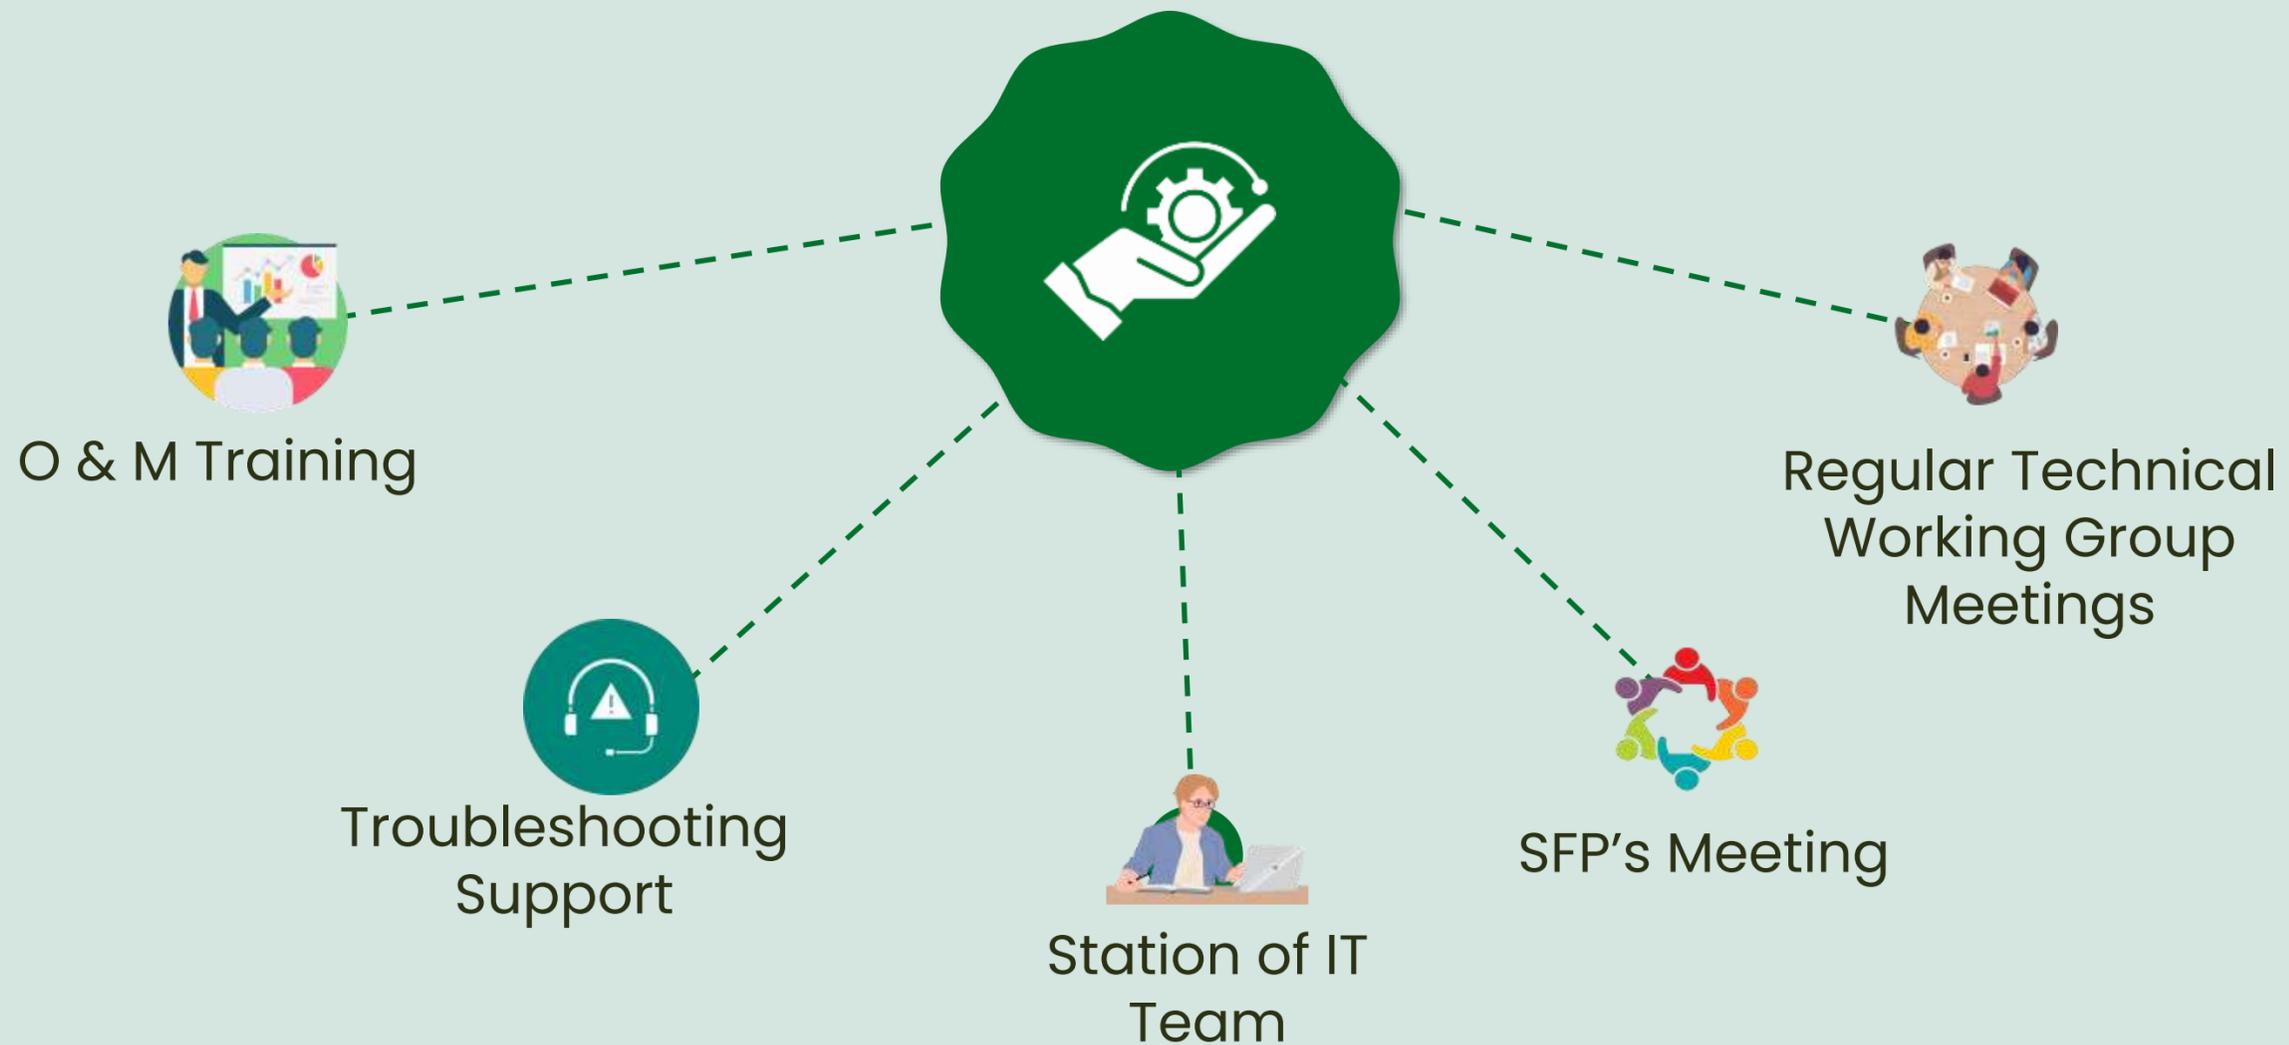

Co-development

Institutionalization –  
System Ownership

Handholding  
Support

Post Project  
Technical Support for  
Scaling up

## Hand Holding Support

# Challenges

# Way Forward

System Operation & Expansion: system operation by users from federal to local levels & communities  
**June 2025**

Model Validation & Improvements  
**May - June 2025**

System enhancements: Incorporating user feedback  
**June 2025**

Mobile app testing & enhancements  
**March - July 2025**

## Planned Capacity Building Activities For Nepal

### Training of Recipient Institute on Operation & Maintenance

- ADVISE (MOALD) - 2nd Week Of March
- NAVIGATE (DoR)- 1st week of March
- Satark (NDRRMA)- 1st week of April
- Need-based handholding support

### Experience Sharing & community Level Training Events

- DRM community-level training and experience sharing - Tikapur- 3rd week of March
- DRM training and experience sharing - Okhaldhunga- 4th week of March
- DRM training and experience sharing - Sindhupalchok- 1st week of April
- Farming Community experience sharing- Madhesh & Bagmati Province- May to June

### Training of Recipient Institute on Product Application

- ADVISE (MoALD) - 2nd week of April
- Satark (NDRRMA)- 3rd week of April
- NAVIGATE (DoR)- 4th week of April

# Demonstration: Satark

NDRRMA  
DSS

---

# Loss & Damage due to Fire, Flood, Landslide & Thunderbolt in last 10 years (from 2015 to 2024) reported in Bipad Portal system

People death  
3752

Estimated Loss  
27 Billion(NPR)

Infrastructure  
Destroyed  
20968

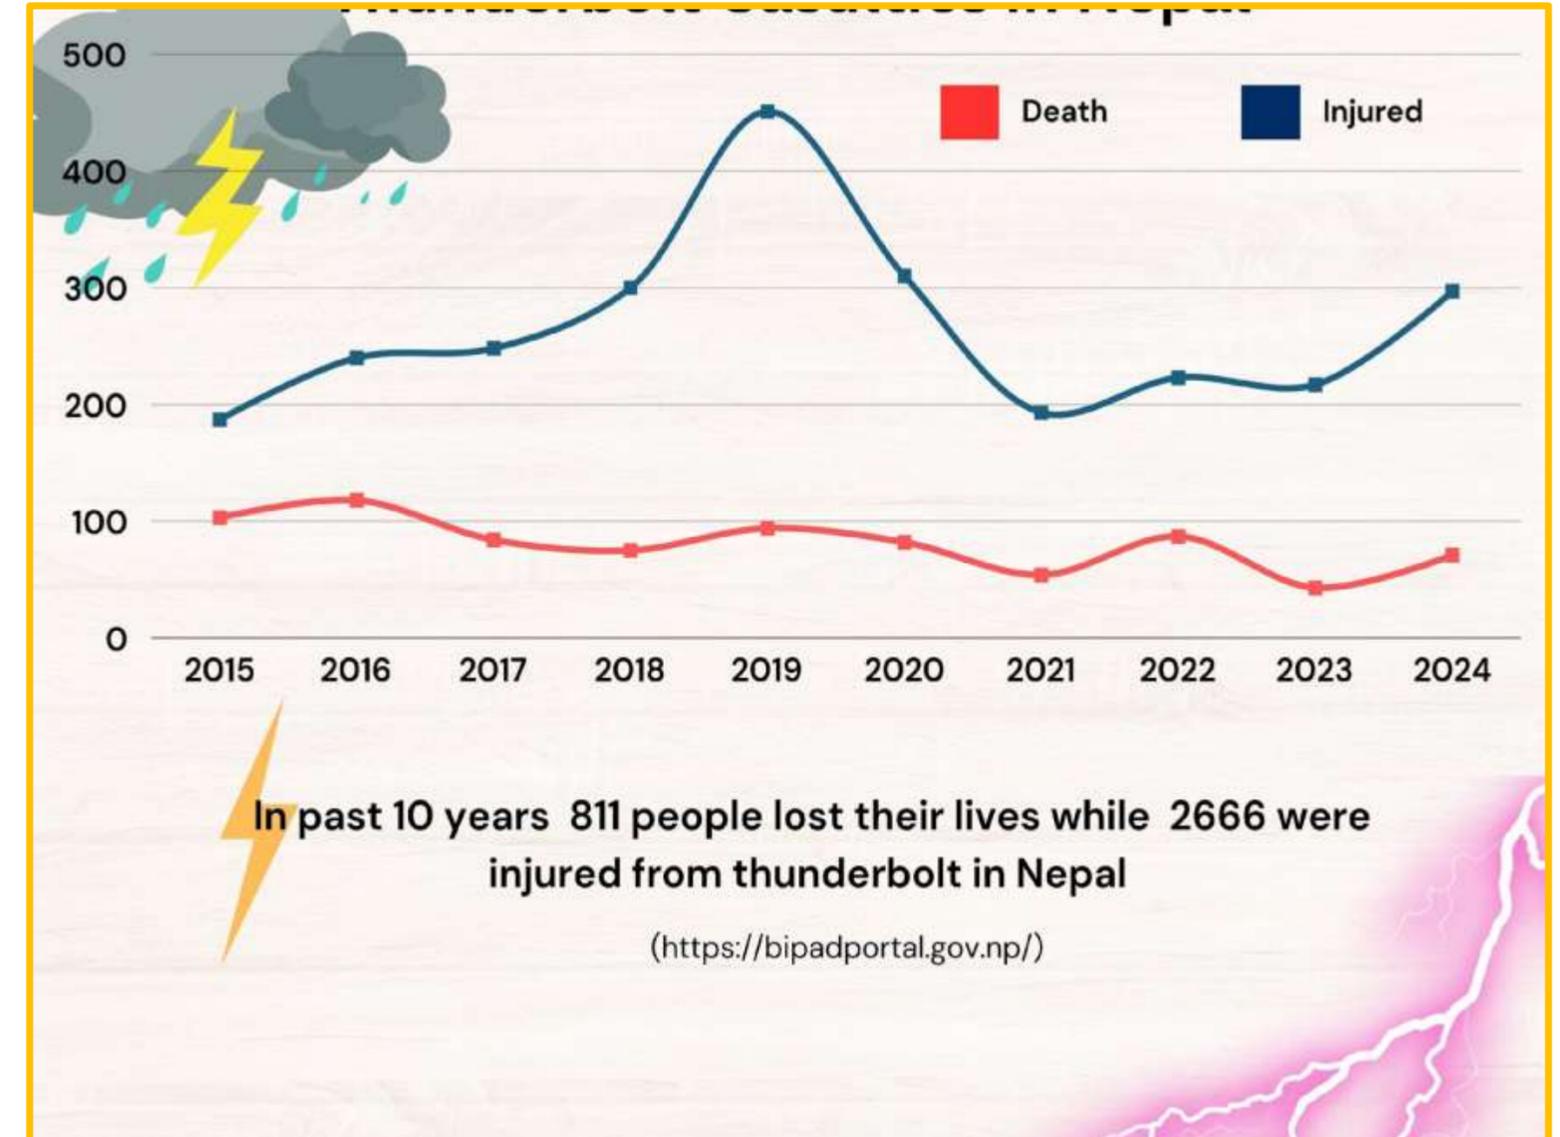

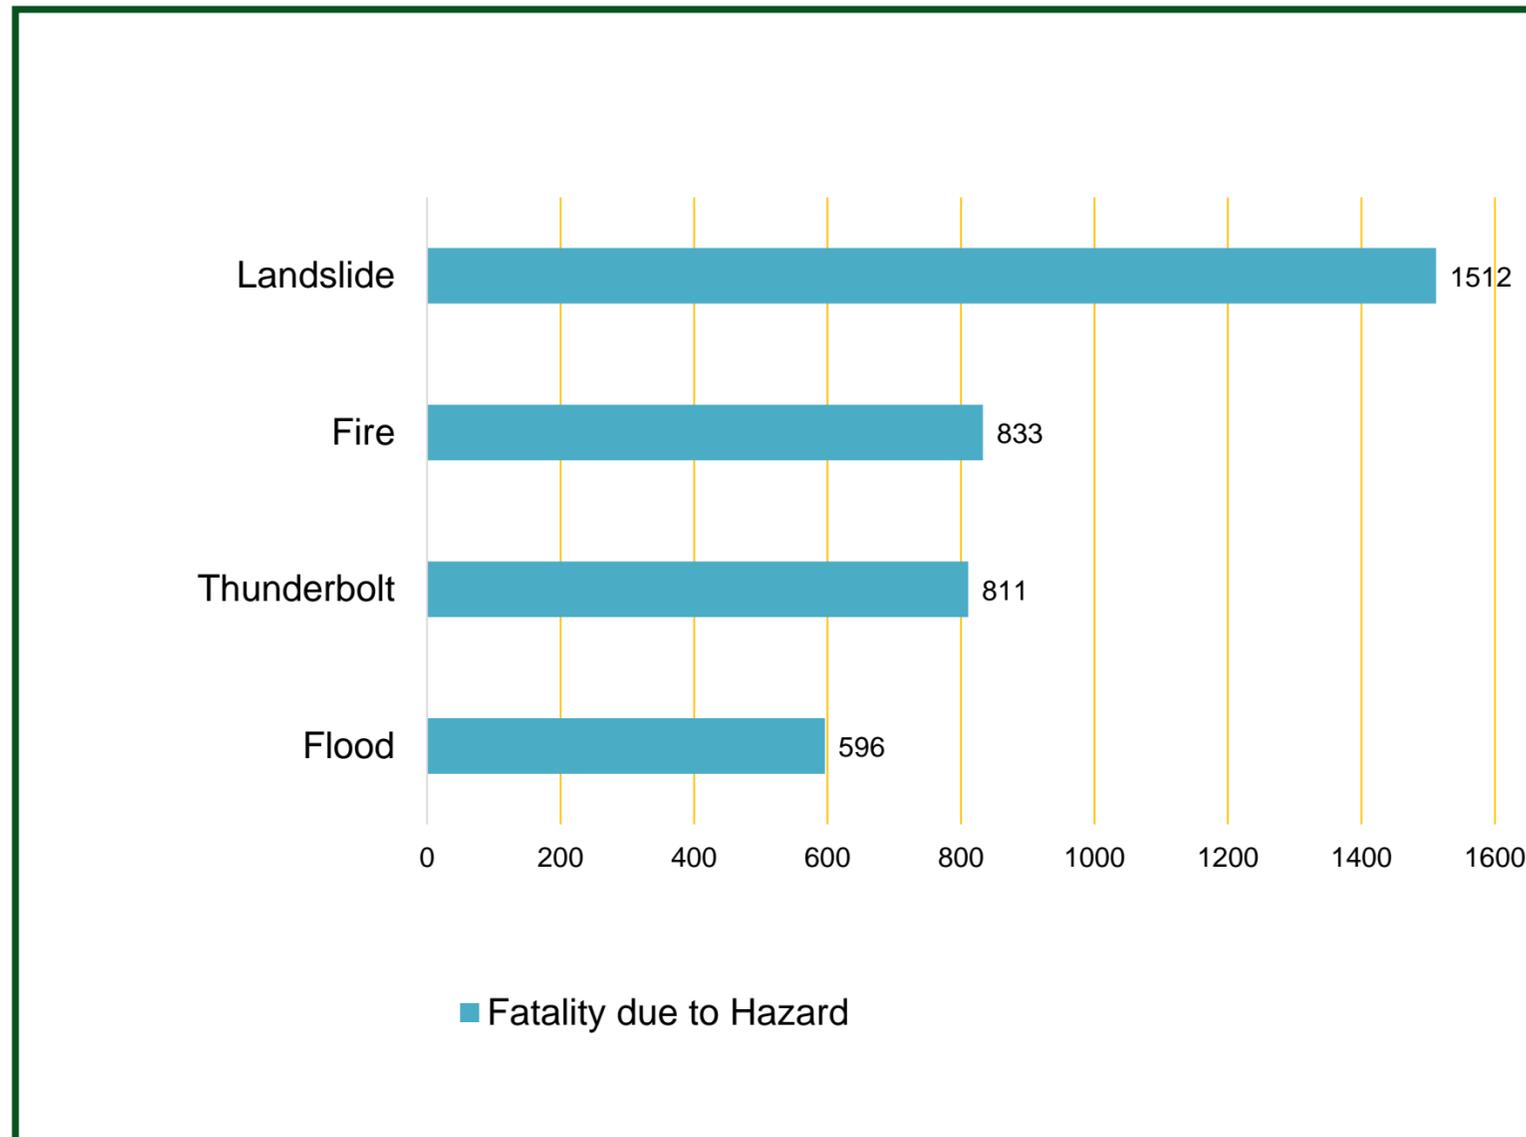

Livestock  
destroyed  
21077

Injured people  
7397

Missing people  
457

Incident  
32581

# Hazard Severity reported last 10 years(2015 to 2024) in Bipad Portal

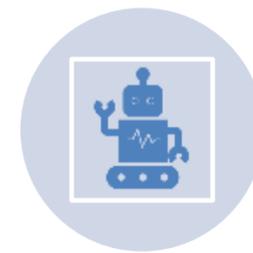

# Decision Support System Importance(DSS)

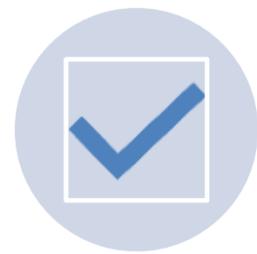

**Real time information access**

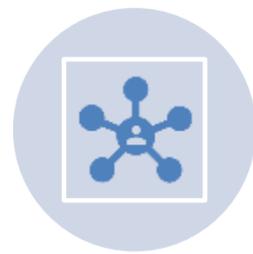

**Risk assessment and Prediction:**  
Identify high risk areas and predict potential disaster impacts

**Resource allocation optimization:**  
Helps to decision makers to allocate emergency response resources efficiently, including personnel, equipment and supplied based on severity and location

**Scenario planning & Simulation**

**Improved communication and coordination**

**Post disaster analysis and recovery planning and building of resilient society**

# Challenges to Decision Support System(DSS)

## **Data Availability and Quality:**

Accessing reliable and comprehensive data across diverse regions of Nepal

## **Connectivity Issues:**

Ensuring reliable internet access in remote areas for real-time data transmission

## **Coordination and Collaboration:**

Effective communication and collaboration between different government agencies and community organizations.

# Way forward

## **1. Data Infrastructure Development:**

- Establish robust data collection networks including weather stations, sensor arrays, and community-based reporting mechanisms
- Standardize data formats and ensure data quality control
- Utilize open-source data platforms for accessibility and collaboration

## **2. Capacity Building:**

- Train government officials, emergency responders, and community leaders on DSS usage and interpretation
- Develop awareness campaigns to educate communities about disaster risks and the DSS functionalities

## **3. Integration with Existing Systems:**

- Link the DSS with existing disaster management platforms and communication networks

## **4. Technology Adoption:**

- Develop user-friendly interfaces accessible through mobile devices and web platforms

## **5. Research and Development:**

- Continuously refine the DSS by incorporating new technologies, hazard modeling advancements, and local community feedback

## **6. Integration with Existing Systems:**

- Link the DSS with existing disaster management platforms and communication networks

# Demonstration: NAVIGATE

**DSB**

---

<http://navigate.dor.gov.np>

---

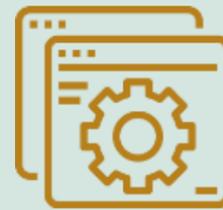

# NAVIGATE DSS

## Implementation & Future Outlook

- Technical officials from the Department of Roads (DoR) have received comprehensive training on NAVIGATE DSS, enabling them to manage alerts and advisory systems effectively
- successful migration of NAVIGATE DSS to the government domain, with a focal person capable of operating and orienting the system efficiently

### Current Achievements

- Built with a user-friendly interface and flexible architecture
- Supports integration of future modelling requirements
- Enables efficient dissemination of alerts through reliable channels

### Application of the system

- Establishing Standard Operating Procedures (SOPs) to formalise stakeholder access and system ownership
- Implementing robust verification methods to assess model forecast accuracy and alert reliability
- Expanding public outreach through strategic alert dissemination channels

### Strategic Priorities

# **Demonstration: Krishi Mausam Sallah Pranali**

## **MOALD**

---

<http://advise.moald.gov.np/>

---

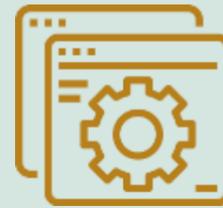

# Krishi Mausam Sallah Pranali

## DSS Way Forward

- Government officials at national and sub-national levels trained in system operations and handling
- Training-of-Trainers trained extension officers in climate information application in the agriculture sector are engaged to orient and train sub-national stakeholders and farming community

### Capacity Development Achievements

- Built with a user-friendly interface and flexible architecture
- Supports integration of future modelling requirements
- Enables efficient dissemination of alerts through reliable channels

### System Application

- Developing Standard Operating Procedures (SOPs) to strengthen multi-level government engagement and access to the system for decision making
- Integrating regular field observations to enhance system reliability
- Evaluate the effectiveness and benefits of district-specific agricultural advisories, focusing on their practical value to farmers in crop and livestock management

### Strategic Roadmap

A lush green rice field under a cloudy sky with a sun flare.

# THANK YOU

## **CARE for South Asia Project, Component 1**

*Contributing to an enabling environment for climate-resilient policies  
and investments for select sectors in South Asia*
